Office Action Summary

Art Unit: 1625

Claims 1-24 are pending.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-24 are rejected under 35 U.S.C. 103(a) as being unpatentable over JP 11-309378 and Grey.

JP 11-309378 teaches an olefin epoxidation process using various amine as co-catalyst, note the Examples 1-12 of the English translation. Grey also teaches similar process using tertiary amine as co-catalyst; note that Abstract. The current process is analogous to the prior art processes since the reactants, reagents and catalyst are obvious variants or possessing species versus genus relationship. Thus, the current process would be deemed obvious over the teachings of the cited prior art.

No claim is allowed.
